## Description

You and your friend decided to play a simple pen-and-paper game. There's one catch—you have only pencils but no paper; the last piece of paper is gone for your beautiful drawings. As a joke, your friend pulls all the pencils out of the case onto the table and says: "Your turn!"

## Objectives

In this stage, your program should print two lines: one line with **any number of** vertical bar symbols representing pencils (for example, `|||` or `|||||||`) and one `Your turn!` string. You should not take any input!

## Examples

### Example 1:

```
1  |||||
2  Your turn!
```

 See hint**Write a program** Report a typo

Code Editor

IDE  +100

```
1 print('|||||')
2 print('Your turn!')
```
